

No. of Functional Features Included in the Solution

Project: **Auto Ticket Classification using Flow Design**

Functional Features Included in the Solution

S.No	Feature	Description	Status
1	Ticket Intake	Accepts ticket text with a ticket ID	Implemented
2	Text Preprocessing	Lowercases, removes punctuation and extra spaces	Implemented
3	Category Classification	Predicts Billing, Technical, Account or General using TF-IDF + Logistic Regression	Implemented
4	Confidence Score	Returns prediction probability for each ticket	Implemented
5	Priority Detection	Marks High, Medium or Low from urgent keywords and message length	Implemented
6	Flow-based Routing	Decision step routes to the right team using TEAM_ROUTES	Implemented
7	Low-confidence Fallback	Sends uncertain tickets to the Manual Review Queue	Implemented
8	Notifications	Acknowledgement for every ticket and alert for High priority	Implemented (console)
9	Feedback Loop	Stores agent-corrected labels for retraining	Planned
10	Reporting Dashboard	Shows tickets by category, priority and accuracy	Planned

Summary

Total features: 10 (8 implemented in the current code, 2 planned for the next iteration).
