

Solution Requirements

Project: **Auto Ticket Classification using Flow Design**

Functional Requirements

FR No.	Requirement	Sub-requirement
FR-1	Ticket Intake	Accept tickets via email, web form and chat
FR-2	Text Preprocessing	Clean and normalise ticket subject and body
FR-3	Ticket Classification	Predict category and priority for each ticket
FR-4	Flow-based Routing	Route ticket to team using decision nodes
FR-5	Low-confidence Handling	Send uncertain tickets to manual review queue
FR-6	Notifications	Auto-acknowledge customer, alert team on high priority tickets
FR-7	Feedback Loop	Agents correct labels; corrections stored for retraining
FR-8	Reporting	Dashboard of tickets by category, priority and accuracy

Non-Functional Requirements

NFR No.	Requirement	Description
NFR-1	Usability	Simple flow view and one-click label correction
NFR-2	Security	Role-based access; ticket data encrypted in transit and at rest
NFR-3	Reliability	System available 99% of the time; no ticket is lost
NFR-4	Performance	Classification completes within 2 seconds per ticket
NFR-5	Availability	Works 24x7 across all intake channels
NFR-6	Scalability	Handles growing ticket volume without redesign
