

Customer Journey Map

Project: **Auto Ticket Classification using Flow Design**

Persona: Support Agent / Customer raising a ticket

Stage	Customer Action	Touchpoint	Feeling	Pain Point	Opportunity (Flow Design)
Awareness	Faces an issue with product or service	Website, app	Confused	Unsure where to raise the issue	Simple ticket form on all channels
Ticket Creation	Submits issue by email, chat or form	Email, web form, chat	Hopeful	Must choose category manually	Auto-detect category from text
Classification	Waits for ticket to be sorted	Ticket system	Anxious	Manual sorting delays and mislabels	Flow classifies category and priority in seconds
Routing	Ticket reaches a team	Assignment flow	Impatient	Ticket bounces between teams	Decision nodes route to correct team first time
Resolution	Agent works on and resolves the issue	Agent console	Relieved if fast	Urgent cases missed	Priority alerts and SLA tracking
Feedback	Rates the support and closes ticket	Survey, email	Satisfied	No learning from wrong labels	Agent corrections feed model retraining
